Subject: Comments for February 26, 2024 Waterfront and Marina Subcommittee Meeting

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Councilmembers Howard and McKillop:

At a previous City Council meeting there was discussion of possibly replacing the eastern steel-plate seawall with a rock/landfill breakwater that the public could walk out on. The idea sounded like a great potential community asset, although I'm not sure if costs were ever assessed.

I'm assuming that the proposed new "shortened" version of the wall is again a steel plate design, but does this at least keep open the possibility of building up the area against the strait side of the new wall with a walkable breakwater?

Sincerely,

Tom O'Brien
6608 Waverly Rd.
